

NEW HIGH TECH SCRUBBER DRIER (Presented at ISSA InterClean 2006)

LINDHAUS' twenty years experience in the manufacture of professional carpet cleaners has led to the creation of an absolute innovative floor scrubber. They have not run along the road of miniaturization of well-known professional machines because this would have led to a similar result as many existing products on the market with all the well-known limits of encumbrance heavy weight and manoeuvrability.

This is a unique machine that joins lightness (only 1.2 kg. handle weight) manoeuvrability, practicality in executing simple water loading and unloading operations with an incredible capability to remove the most obstinate dirt.

LINDHAUS LW 30 - 38 pro is the perfect machine to wash any kind of hard floors, from the roughest to the most delicate. Its manoeuvrability, the low profile of the base and the inclination of the vertical body make it very pleasant to use and give an incredible result.

The floor remains perfectly dry in both directions, allowing to use the just washed area without waiting time.

THE WORLD LOWEST PROFILE

The base height is 14 cm (5,5in.) only and it allows easy access under low furniture.

The extremely light total weight and the comfortable handles permit to lift and transport the machine on stairs or to load it on cars. All the machine's functions are independent and can be selected without taking off the hand from the handle.
